

PERIOPERATIVE PAIN MANAGEMENT AND CARE COORDINATION

FREE Online Course
Continuing Medical Education Credits

This evidence-based educational opportunity will empower clinicians to directly impact the opioid epidemic by learning and implementing best-practice care management during the perioperative period.

The combined modules satisfy Michigan's licensure requirement of 3 hours of pain and symptom management for:

- Surgeons
- Advanced Practice Providers
- Surgical Residents

Module 1: The Role of Acute Care Prescribing in the Opioid Epidemic

1.25 AMA PRA Category 1 Credit(s)TM

- Describe the role of acute care prescribing in the current U.S. opioid epidemic
- List the risk factors of opioid use for acute care patients
- Detect the factors that could potentially influence acute care opioid prescribing

Module 2: Perioperative Care Coordination

1.75 AMA PRA Category 1 Credit(s)TM

- Describe the impact of uncoordinated perioperative care
- List the three key components to perioperative care coordination
- Identify two areas of improvement for your patients' care coordination
